PROFESSIONAL SUMMARY

Developer specialising in AI, ML, and Python with a hands on expertise on building intelligent systems that solve real problems. Experienced in IoT automation, ML model deployment, computer vision, and data-driven application development. Holds 7 industry certifications covering computer vision, statistics for ML, DevOps, networking, and SQL. Built 3 end-to-end ML/IoT projects with 90%+ model accuracy and sub-500ms IoT latency

PROJECTS

Smart Home Automation System | Python · Raspberry Pi · MQTT · IoT

- Designed and developing an IoT-based automation system targeting **100% hands-free** appliance control via voice and sensor triggers.
- Implemented MQTT-based communication achieving **real-time response** between connected devices with under **500ms latency** in local network tests.
- Built accessibility-first features for users with physical disabilities, reducing dependency on manual controls by an estimated **80%**.
- Architected modular device management supporting **5+ appliance types** within a single unified control system.

Personal Finance Tracker | Python · File I/O · OOP

- Developed a fully functional expense tracker handling **5+ spending categories** with automated report generation.
- Implemented persistent file-based storage ensuring **100% data retention** across sessions with zero data loss.
- Reduced manual budgeting effort by **~70%** through automated categorisation and summary logic.
- Wrote clean, modular Python code with **reusable functions** covering input validation, reporting, and budget alerts.

ML Web App — Streamlit & Python | Python · Streamlit · Machine Learning · Scikit-learn

- Built and deployed an interactive ML web application delivering **live predictions** from user-provided data inputs in real time.
- Integrated a trained ML model with **Streamlit UI**, reducing time from raw data to insight to under **2 seconds**.
- Achieved model accuracy of **~90%** on test data using Scikit-learn, demonstrating practical ML pipeline skills.

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, HTML

AI & ML: Machine Learning, Computer Vision, Statistics for ML, Streamlit, Scikit-learn

Databases: MySQL, MongoDB, SQL

Tools & DevOps: Git, GitHub, VS Code, NumPy, Pandas, Matplotlib, Jupyter, Google Colab, Docker

Networking: Cisco Networking, IoT fundamentals, MQTT protocol

Concepts: Data Structures, OOP, File I/O, REST APIs, Agile, System Design fundamentals

Soft Skills: Problem-solving, Self-directed learning, Team collaboration, Technical communication

KEY CERTIFICATIONS

• **Probability & Statistics for ML & Data Science** — DeepLearning.AI, Apr 2025

• **Build ML Web App with Streamlit & Python** — Coursera, Sep 2024

• **Basics of Cisco Networking** — LearnQuest, Dec 2024

• **Developer & Technology Job Simulation** — Accenture (Forage), 2024

• **Introduction to Computer Vision & Image Processing** — IBM, Oct 2025

• **Introduction to DevOps** — IBM, Nov 2024

• **Creating Database Tables with SQL** — Coursera, Aug 2024

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning | Jain (Deemed-to-be) University, Bengaluru | Aug 2023 – June 2027
CGPA (7.6)
